WILMINGTON, N. C., MONDAY, FEB. 8, 1858.

We are now forwarding bills for subscription, amounts will be remitted without delay.

The Great Northern and Southern Mail.

steamers. His calculation is that the trip could thus to their patriotic devotion. be made in about four days.

Orleans by the proposed route. reference to this matter, namely, the establishment of a lacter, and plots for their ruin? line of first-class sea steamers to perform daily trips between Charleston and Fernandina, carrying the great mail at a sufficiently high average rate of speed to meet the requirements of the case, and secure for the route the advantage in time over that by sea from New York direct to Fernandina. Our surprise arises from the fact that Wilmington has been named as a terminus for the line of steamers to Fernandina, and it certainly to five hours over Charleston.

It is calculated, we believe, that the service between New York and New Orleans, via Charleston, can be thus performed:

New York to Wilmington,32	hours.
Wilmington to Charleston,	
Charleston to Fernandina,10	
Fernandina to Cedar Keys, 6	
Cedar Keys to New Orleans24	
	CONTRACTOR CARRIED

The proposition in regard to the three boats to compose the line is said to be, that one-third be raised at then incontinently took himself off. the point—say Wilmington or Charleston—from which they are to start, to Fernandina-one-third by the Companies between that point and New York, and one-third by the contractors or builders of the boats or ships.

This, then, is a question for Wilmington as well as Charleston, and we make these remarks for the double purpose of bringing it to the attention of our people, and of making some enquiry in regard to it of the authorities of the Wilmington & Weldon R. R. Company, under whose direction, we presume, Mr. Ashe entered into consultation with Charleston. Has Wilmington nothing to say, or is there nothing she is prepared to do about

We notice a newer and truer sense of nationalism asserting itself in Ireland, a sense that prompts Irishmen to honor those who have honored them, rather statue of Thomas Moore, the "Bard of Erin," who, true to his country, and infused the soul of patriotism in- made a speech against the Lecompton Constitution.— and followed by her male companion disappeared up to every line of his exquisite melodies. We now see that Mr. Wilson also made a speech against it. Mr. Green Eighth street. the City of Limerick proposes to erect a statue to the memory of Sarsfield, who defended Limerick against William of Orange, and so successfully as to compel the ligation resolutions appointed Mr. Boyce of S. Carolina, Irishmen, which treaty was, of course, violated, after the ternal taxation. A long debate ensued on an unsatisprejudiced Macaulay awards to Sarsfield the characteris- before the investigating committee. He was finally rethe City of the violated treaty.

Suicides.

We hardly take up a paper from any quarter without being startled by the announcement of some suicide or other. These things, we know, have always occurred, and, we fear, always will occur, to some extent, but their frequency of late times is positively startling. We fear it is the necessary consequence of the hard timesthe painful re-action from the intoxication of delusive prosperity—the failure of cherished speculations, followed by the certainty of pecuniary ruin, and in too many cases, exposure fatal to reputations hitherto above suspicion. But even without the occurrence of the reverses which have marked the recent commercial history of the country, we cannot but think that the undue tension of the faculties, the anxious straining after progress in business matters, the haste to be suddenly rich, suddenly prominent, suddenly something or other, which have grown upon us from day to day and from month to month and from year to year, have produced a mor- ers will follow in regular succession. bid action of the brain, unstrung the nerves, deadened the sensibility to the humbler and cheaper pleasures of life, and prepared them to cast away that in which they have no longer a healthful enjoyment.

It is seldom the serious, hardworking, laborious man who commits suicide. The people of an apparently gay, thoughtless, restless temperament are most apt to do so. The laughing, sportive Frenchman, far surpasses the gloomy and reserved Briten in his suicidal propensities. The grave, taciturn Turk is never known to make away with himself. June exceeds November in its list of suicides. The man who has been born in humble circumstances and who has been forced to endure privations and bring up a family on the most straightened means, hardly ever voluntarily abandons the life-long contest.—

Namely ever voluntarily abandons the life-long contest.—

While the faculties are kept within a certain sphere or the faculties are faculties are kept within a certain sphere or the faculties are faculties are kept within a certain sphere or the faculties are faculties are kept within a certain sphere or the faculties are faculties are faculties are kept within a certain sphere or the faculties are faculties are faculties are faculties are faculties. The faculties are faculties. While the faculties are kept within a certain sphere or circle of duties and labors, while the definite average re- of thirty-five to forty millions of dollars. sult of these labors alone is looked for, even failure to obtain that, seldom so unhinges the mind as to wholly destroy its balance and countervail the first law and impulse of nature—the preservation of our own life. Suicide is a speculative disease. It is frequent in a country of revolutions like France, rare in England-unknown Office, under the management of S. F. Butterworth, cultural Chemist) and Bickell, of Maryland. among the changeless Asiatics. Every sudden revulsion esq., an instance of this nature has recently been develin the United States produces its crop of suicides, for it unsettles the mind-drifts it from its moorings, makes raw gold intrusted to him for refinement, a credit of two of ammonia, stimulates the soil, but at the same time it the prey of alternate hopes and fears, gives to our feelings a feverish, speculative, unreal character, causing us impoverishes it—acting like strong drinks upon the human system; while Rhodes' Super-Phosphate of Lime' had a protracted session on Saturday. Mr. Stone has to live in an unnatural atmosphere, and preparing us to fall the victim of any sudden reverse of fortune, any sud- tled, in rendering his account, to claim an allowance of food upon the animal body. Such is the difference be- Matteson, during the pendency of the Tariff bill stated den check to ambition.

tion is turned in one direction—turned until it has begun to grow fatigued, but still turned from the impossibility of withdrawing it or fixing it upon anything else until Kansas is disposed of, and that may yet take time, for every parliamentary device will be resorted to by the time, but nothing else will.

We glance over the debates in Congress, and Kansas stares us in the face. We open our exchanges, and still Kansas is the topic of discussion. We receive private letters from friends at the seat of government, and the same engrossing subject enters into the corres-&c., due this Office, by letter, with the hope that the pondence. It is there—or rather it is here, there, everywhere-it is upon us-it demands settlement-it must be settled. The issue can be deferred no longer. The THANSLENT Advertisers will please bear in mind their advertisements cannot appear in this paper without respect to persons.

No name for either the Daily or Weekly Journal, will hereafter be entered on our list without payment being made in advance, and the paper will in all cases be discontinued when the time paid for expires.

Oct. 29, 1857.

There is no proof that and soon had reason to suspect that the bulletin was untrue. So completely could Burr command his features which no man can foresee, in the future, if this issue is northern States of the republic, Queretaro, San Luis, This cannibalism is confined mostly to the older natives. and control his feelings."

A Verdant Pair in an Omnibus. A rather amusing incident took place yesterday, says the Philadelphia Gazette. People who are accustomed to riding in the Twelfth street omnibuses will remember that an agent is stationed at the corner of Race street, to prevent any sixpenny short comings on the part of the drivers. Yesterday afternoon, while standing at his post, the agent observed a young couple who, I cannot help telling you a little incident of Secretary | it was evident at first sight, had never before visited

well as to the mirth of the other passengers, the lassie aforesaid jumped from her seat, seized the grimmy paw We noticed a phenomenon this morning—ice— of the importunate Jehu, and shook it with a cordiality that fairly made its owner wince. "Well, I declare," water in the streets. It was not thick, but it was posi- said she "but I am glad to see you. Then scating herself and turning to her companion added, "Why Josh, that air must be Jake-Jake's in the city you know. As soon as I get done riding I'm a going to have a regular talk with him." The driver, who overheard this remark, and was sitting convulsed upon his box, soon reinserted his hand, and again received a hearty shake in a good old pump handle style. "All right," says she, "I'll see you by and by." At this moment a lady who had crammed a pocket handkerchief in her mouth to prevent herself from laughing, began to turn black in the face, and but for the presence of mind shown by our reporter, who relieved her by patting the back of an enormous talma, the delicate mouchoir would doubtless have produced strangulation,

The pantomine, however, attracted the attention of under the Lecompton Constitution. The resolutions in- the country lassie, who asked, "what are ye larfin at.

Under the polygamic or "plurality system of Mor-mondom, as they prefer to call it, there is, as might be expected, many a new and curious development of social fe. A recent visitor to Salt Lake City relates the fol-

"Elsewhere the attentions of the former to the latter pass for nothing; here a girl knows that her partner may er sort, love to use their position, and carry on canvas third wives take little heed of the wooing; but you may Havana, with dates to the 30th Jan., has arrived. The now and then see a woman glancing too eagerly round. other women, if they see her, will come and tell her she is no Mormon to look so after her husband, and laugh at her foolish expectation of keeping an entire husband to herself. That girl now evidently knows the wife is watching her, and coquets all the more eagerly with the husband; perhaps she may refuse him after all, perhaps not wish to do so, perhaps find herself unable if she wishes; but they are not the only couple followed by eves struggling to see, and yet not to believe. They tell me - yonder loves his wife beyond the wont of husbands in this part of the world, and will not marry another; so my partner, herself a wife, though not in the first lustrum of wives, tells me, and intimates her opinhe's only teasing his wife; though he wont marry again, he likes doing that. Were I unmarried, I would ask ceipts of customs at various ports during January, the president to make him marry me.' 'What for, to think herself better than the rest of us; why should she?' I turned the subject, having no wish for an argumentum ad hominem, and some places are unsuitable to the real argumentum ad feminam."

Men, too, of the brighttalking of a strange affair, which it is thought may give annexation. that would capsize a monogamist craft. Second and third wives take little beed of the wooing; but you may the fearful collision between the Lyonnais, a French steamer belonging to the Messrs. Gauthier Brothers, and the Adriatic, an American ship, when the former vessel foundered. Upon that occasion the American Captain left the scene of the disaster without troubling himself about the result, and on reaching his destination omitted to make any mention in his report of the unfortunate occurrence. Several months having elapsed, the Messrs. Gauthier learned that the Adriatic was by ing at anchor in the harbor of Ciotat. An order was immediately obtained to sequestrate her and bring her here where a stricter survillance is maintained in the port. Capt. Durham lost no time in protesting against this measure, and appealed to our Tribunal of Commerce, in which the pleading of a young avocat, M. Aycard, himself an American, by descent, gained the day for his client. From this judgment the French owners of the Lyonnais appealed to the Court of Appeals at Aix, and the cause was brought before that tribunal, when the previous decision was quashed and the American ship declared a lawful prize.

During the proceedings in this latter court the Adria-tic was unrigged. Captain Durham was not the man to submit quietly to an adverse sentence, and accordingly, in concert with one of his fellow countrymen, he devised the following scheme. The ship Meaher, commandtease her?' 'No, to teach her: then she would not ed by Captain Smith, was also under sequestration on account of a heavy debt contracted by her, and which had not been paid. Capt. Smith, a daring and resolute fellow, contrived to bring her alongside of the Adriatic. This manœuvre being effected the Meaher's enne, of December 8, in the Phare de la Loire, says :already acquired a national reputation. An article of was lodged, but a whole day had been lost. They say this description was recommended in I84I by Baron that the prefect ordered out the Chacal, a war paddle Liebig, and has ever since been considered in Europe, steamer stationed in the old port, and away she has gone guns, other arms, and some powder, all of which were convicted. "This valuable fertilizer, I understand, is not designed | conveyed from the Meaher to the Adriatic. This cu-

The "religious newspaper," called the Independent, was (probably continues) the property of Bowen & Mc-Namee, and had a considerable circulation in commercial circles all over the country, on account of its giving a weekly list of failures and suspensions. This was all very well, until B. & McN. had to inscribe their own names on this black list. Immediately after, they discovered that the publication of the list wounded the feelings of many parties, and dropped it. When this was done, one newspaper agent in Philadelphia, who used to sell 300 copies a week over the counter, found his sale diminished to two copies, at which it continues

"Consistency, thou art a jewel!"-Rockville Sentinel.

> SLAVERY IN CALIFORNIA .- Senator: Gwin, some years ago, carried several slaves with him to California, who, after working about a year, sued him for wages. The case has lately been decided by Judge Norton, of San Francisco, who, in his decision, stated that no contract was proved, and that the circumstances of these slaves bore an analogy to those of adult children who remained with their parents and worked for them. The law would not imply a promise to pay wages; and some proof of contract or request must be proved to justify a judgment in favor of the claimant.

A Dove Story .- A gentleman of this city, who has a dove cot at his residence at the West End, relates the following incident as having occurred last week. In the young female squab. Finally, upon one occasion when the female appeared at the door of the cot, the male sailthen fell suddenly to the ground. The inmates of the house who had witnessed the proceeding, immediately went out and ascertained that the dove was dead but no Abolition of Slavery in Kansas.—The following wound was found sufficient to cause death. Possibly

OPERATIONS IN CROUP .- Though the opinions of medical men are very much divided as the absolute meritof surgical treatment in croup and kindred diseases, it is asserted to be a fact, well established by numerous observation, that out of thirty-five operations, conducted with consumate skill and with the best instruments. twenty-eight cases on an average terminated fatally. Some of the reasons of this result are quite obvious. tube, hardly the diameter of eight or nine lines; to remove the membrane of croup, a pair of forceps-accord ing to the heretofore best approved methods of trached tomy, and particularly that of Trapeau-is to be introduced into the larynx, and for this purpose the cartila ing bleeding from the thyraid veins, which in many Illthe adventitious membrane, laid open by the incision sometimes possesses so little cohesion as not to admit of being laid hold of by any instrument in order to be deupon the opening and otherwise desirable for the healing lative Assembly, be and the same is hereby repealed.
